Hobo	Hobo is a lovable old rogue who wants to reach the other side of Grand Central Railway Station. But first he must cross a multi-lane freeway. 'honk, honk' 'toot, toot'. Those motorists won't slow down for anyone - so keep on your toes. Next Hobo scales the station wall. But watch out for the security guards waiting to send poor Hobo off to jail! Once over the wall Hobo does a spot of train-hopping. This requires real skill. Hobo must jump on top of one train, then on to another moving in the opposite direction. Watch out for the purple trains, they pass under tunnels and knock Hobo off! Happy train-hopping.
	On level 2, you can jump in the diagonal corridors, but can't walk downwards in the vertical corridors. After jumping, you are not able to jump again for about a second.
